

**ASBESTOS ANNUAL LETTER OF NOTIFICATION
2018-19 SCHOOL YEAR**

The Browns Valley School district has had management plans prepared for all school buildings in the district. These plans are available for your inspection Monday through Friday during regular school days and normal school hours at the District Office.

The required six month surveillances have been conducted to inspect the asbestos containing materials (ACM) for change in condition. Any changes in condition have been and will be noted on the Periodic Surveillance forms found in the Asbestos Management Plan. Also, the required three year re-inspection of asbestos containing materials has been conducted by an accredited inspector. An Operations and Management Program has been implemented by the Browns Valley School District to keep the ACM located within the building(s) in good condition.

Short-term workers (contractors who work in the district) must be provided with information regarding the asbestos in the building prior to the beginning of work.

Should you have any further question, you may contact Brenda Reed, the district's designated person. The telephone number where she can be reached at is 320-695-2103.

Annual IAQ Notification Letter

The Browns Valley School district advocates a healthy school environment in which the surroundings contribute to a conducive learning environment for students and productivity for teachers and staff. All school occupants should have a sense of comfort, health and well-being.

To help accomplish this goal, the district has taken on a task of actively managing and improving its indoor air quality (IAQ). This includes an IAQ Management Plan using guidelines provided by the MN Department of Education, and the "Tools for School" document developed by the U S EPA with the American Federation of Teachers, Association of School Business officials, Council for American Private Education, National Education Agency, National Congress of Parents and Teachers (PTA) and American Lung Association.

Matt Goodhart has been designated as the IAQ Coordinator for the Browns Valley School District. He has been trained and certified as an IAQ Coordinator by the MN Department of Education.

If you have questions or concerns about the Indoor Air Quality in the Browns Valley School District, or if you would like to review the district IAQ Coordinator compliance report by the MN Department of Education, you may stop at the district office to review it.

Pesticide Notice

State law requires schools to inform parents and guardians if they apply certain pesticides on school property.

Specifically, this law requires schools that apply these pesticides to maintain an estimated schedule of pesticide applications and to make the schedule available for review or copying at the school office.

State law also requires that you be told that the long term health effects on children from the application of such pesticides for the class of chemicals to which they belong may not be fully understood.

If you would like to be notified prior to pesticide applications made on days other than those specified in the estimated schedule (excluding emergency applications) please contact Matt Goodhart, Indoor Air Quality Coordinator at 320-695-2103.
